Model	AMDZ-96C1																																																											
Voltage	220V/60HZ																																																											
Power	1350W																																																											
Current	6.0A																																																											
Refrigerant	R410A																																																											
Dehumidification Capacity	36.5L/D at T=20°C; RH=60%																																																											
	92.4L/D at T=32°C; RH=80%																																																											
Process air																																																												
Rated airflow	950m³/h																																																											
Blower motor power	/																																																											
Connection inlet Ø	200mm																																																											
Connection outlet Ø	200mm																																																											
Fresh air																																																												
Rated airflow	No																																																											
Blower motor power	No																																																											
Connection inlet Ø	No																																																											
Connection outlet Ø	No																																																											
Heat exchanger																																																												
Heat exchange rate	No																																																											
Other data																																																												
External residual pressure	100Pa																																																											
Drainage	Built-in water pump																																																											
Noise	44dB																																																											
Filter	Primary filter G4																																																											
Purification device	No																																																											
Waterproof level	IPX4																																																											
Operating temperature	5-38°C																																																											
Application area	100-150m2																																																											
Machine size	108*65*38cm																																																											
Weight (packaging excluded)	53.5kg																																																											
FEATURES: 1. Solid: sturdy housing in sheet metal, thickness up to 1.2mm. 2. Low noise: U-shaped air duct design, lower noise and larger air volume. 3. Efficient: Panasonic compressor. 4. Accurate: SENSIRION temperature and humidity probe. 5. Fresh: Primary filter to clean the air. 6. Drainage: water pan in material 304 stainless steel and built-in water pump. 7. Intelligent: WIFI control, with 485 communication protocol and mobile APP control. 8. External control panel 9. Easy access to the internal components of the dehumidifier for the maintenance.
